Catalysts — Open Access Catalysis Journal

Catalysts (ISSN 2073-4344; CODEN: CATAJ) is an open access journal of catalysts and catalyzed reactions published monthly online by MDPI.

- **Open Access** - free for readers, with publishing fees paid by authors or their institutions.
- **High visibility**: indexed by the Science Citation Index Expanded (Web of Science), Scopus and other databases.
- **Rapid publication**: Manuscripts are peer-reviewed and a first decision provided to authors approximately 28 days after submission; acceptance to publication is undertaken in 9 days (median values for papers published in this journal in 2016).

Impact Factor: 2.964 (2015) · 5-Year Impact Factor: 3.194 (2015)

Aqueous and Surface Chemistries of Photocatalytic Fe-Doped CeO₂ Nanoparticles

by Duangdao Chaneei, Sukon Phanichphant, Aupatham Nakaruk, Sajjad S. Mofarah, Pramod Koshy and Charles C. Sorrell

Catalysts 2017, 7(2), 45; doi:10.3390/catal7020045 (registering DOI) - 29 January 2017

Abstract

The present work describes the effects of water on Fe-doped nanoparticulate CeO₂, produced by flame spray pyrolysis, which is a critical environmental issue because CeO₂ is not stable in typical atmospheric conditions. It is hygroscopic and absorbs ~29 wt %

Engineering Surface Ligands of Noble Metal Nanocatalysts in Tuning the Product Selectivity

by Lei Jin, Ben Liu, Searle S. Duay and Jie He

Catalysts 2017, 7(2), 44; doi:10.3390/catal7020044 (registering DOI) - 28 January 2017

Abstract

Nanosized noble metal catalysts supported on high-surface-area support are of great importance for numerous industrial chemical processes to mediate reaction pathways in heterogeneous catalysis. Control of surface area and surface energy of nanocatalysts is a key to achieving high activity and selectivity for
